Kevin In this work shop he will give you the tools to free yourself of all fears you may hold and may not be consciously aware of. We are multi-dimensional spirits living in a multi-dimensional universe and some of us may have been conditioned to think pain and fear are real but they are not, it is an illusion, there is only unconditional love. The energy heals, clearing and transforming any misguided energies the client may have not in line with their highest good.

The merging of the soul and heart: He utilizes many different healing modalities; I suppose you could call him a spiritual freestyler! Some people have also claimed to feel lighter and say they have had a load taken off them.

Kevin will also show you how and where negative thought may come from and how to very easily let them go - a truly empowering work shop not to be missed. Everybody on mass will receive the healing with unconditional love.

Bradley Pitt and Darren Curtis will show how the energies of Spectra connected with the higher spiritual intelligence are bringing forth the new pictographic light-sound codes so we can tap into a greater reality for healing, consciousness raising and thought expansion. Then experience live interdimensional music to realign the connection and merging with one's Light Body.
